Assignment 0206 Feedback

Proficiencies for *1a* and *1b* still only go as high as | in this assignment due to our still being in the early going with respect to these outcomes. The next assignments with these proficiencies will be expansive enough to merit a + maximum.

William R. Husted

whusted / willyhusted@comcast.net

1a — Great job with figuring out and issuing process/memory/file commands. (|)

1b — Looks safe to say that you can redirect I/O at will. (|)

1c — You connected to and worked with *my.cs.lmu.edu* and *screen*, respectively. (+)

3a — Good forensics work there! The only evidence that was completely off was the one for the Linux kernel file(s), but that was it. (+)

4d — You did a great job all around in terms of locating the necessary information, from finding the right command options to your CSI work. (+)

4e — Commit frequency and messages are appropriate for the work done. (+)

4f — Submitted largely on time. (+)
