Assignment 0220 Feedback

The proficiency for *2d* only goes as high as **|** in this assignment due because this is just the first of your operating system implementation assignments. The next assignments with this proficiency will be expansive enough to merit a **+** maximum.

James E. Ho *JamesEHo / ho.james.ed@gmail.com*

2d — You've invoked 3 system calls successfully, with basic feedback for each one given the scope of this assignment. Easy peezy. (**|**)

4a — Code functions as intended. For something this brief, that's pretty much all there is to it. (**+**)

4b — Not much to do here in terms of separation of concerns, but it is noted that you sent your error messages to `stderr`, and this counts as a form of separation of concerns. (**+**)

4c — Not much code to read, so it better be readable! And it is, except for some comment blocks that really don't belong in your code anymore (see inline comments). (**|**)

4d — You did your due diligence here in looking up system calls you can use then calling them correctly. (**+**)

4e — Commit frequency and messages are appropriate to the work performed. (**+**)

4f — Submitted on time. (**+**)
